PROPOSED INTERGOVERNMENTAL AGREEMENT

Department: Resource Management

Other Part(ies): Illinois Department of Natural Resources State Historic Preservation Office (“SHPO”), Springfield, Illinois; and the Illinois State Museum, Springfield, Illinois

Request: Authorization to enter into an intergovernmental agreement to streamline the permitting process between the agencies related to compliance with the Archaeological and Paleontological Resources Protection Act (20 ILCS 3435/.01 et seq.) (the “Act”).

Goods or Services: This agreement will serve as a general permit to conduct archaeological investigations on lands owned, managed, and leased by the Forest Preserves of Cook County (the “Forest Preserves”) as required by the Act in lieu of the issuance of individual permits.

Agreement Number(s): N/A

Agreement Period: Five (5) years from date of execution

Fiscal Impact: None

Accounts: N/A

District(s): Districtwide

Summary: The Forest Preserves is responsible for protecting and preserving archaeological and paleontological resources on public lands owned by the Forest Preserves, pursuant to the Act. The Forest Preserves, through the Illinois State Archaeological Survey, has undertaken a records review of its archaeological resources - both known and unknown - following management priorities established within the Natural and Cultural Resources Master Plan. This work has involved verification and identification of new site areas, identification of threats to archaeological resources, and development of appropriate resource management strategies for cultural resources located on Forest Preserves land, so that these invaluable resources can be preserved and protected for future generations.

This intergovernmental agreement stipulates personnel requirements, field and laboratory methods, reporting, and curation obligations for work under the Act for the purpose of reducing the number of individual permits to be issued across the many investigation sites occurring on Forest Preserves property, increasing efficiencies for all involved agencies. A functionally identical agreement was previously in place since 2016, but has since expired.

The SHPO is the state office designated as the lead agency responsible for implementation of the Act. The Illinois State Museum, a division of the Illinois Department of Natural Resources, is a statewide system of museums responsible for curation and data recordation under the Act, for the purpose of preserving and maintaining a tangible record of Illinois' natural and cultural heritage.

Good(s) or Service(s): Right of Entry Agreement is for the Army to survey, make test borings, and carry out other exploratory work on Forest Preserves property as may be necessary in connection with

the Army's proposed work with the McCook Levee. The McCook Levee is an existing levee along the Des Plaines River which reduces the risk of flooding in the communities of McCook, Lyons, and Summit, Illinois.

Contract Value: N/A

Contract period: Six (6) months from the date of full execution

Estimated Fiscal Impact: None

Accounts: N/A

Contract Number(s): N/A

Concurrences:

The Chief Financial Officer and Chief Attorney have approved this item.

Forest Preserves staff have reviewed the plans associated with this proposed right of entry agreement and have found them to be acceptable; therefore, it is recommended that the Forest Preserves of Cook County Board of Commissioners approve this proposed agreement.

District(s): 16

Summary: The Army plans to do soil borings and other exploratory work on both property owned by the Forest Preserves and property owned by Metropolitan Water Reclamation District ("MWRD") and leased to the Forest Preserves. For property directly owned by the Forest Preserves, the Army is requiring the execution of a Right of Entry Agreement. Under such Right of Entry Agreement, the Forest Preserves is forgoing its standard fees as well as standard agreement terms such as insurance and indemnification. However, the Forest Preserves will require MWRD to complete a Construction Access Permit with all of the Forest Preserves standard terms, excluding fees. This waiver of fees is consistent with the Memorandum of Understanding between the Forest Preserves and MWRD approved by the Forest Preserves of Cook County Board of Commissioners on May 11, 2017.

PROPOSED MISCELLANEOUS ITEM OF BUSINESS

Department: Resource Management

Summary: Requesting authority, pursuant to Section 9 of the Forest Preserve District of Cook County Act (70 ILCS810/9), to submit Harms Woods for Illinois Nature Preserve ("INP") dedication.

This dedication contributes to one of the key goals set forward in the Next Century Conservation Plan to dedicate 20,000 acres by 2025 as INPs. Dedication of a site as an INP provides the highest level of protection for land in Illinois, and is granted only to natural areas of exceptional ecological quality.

Harms Woods is an approximately 170 acre preserve adjacent to the Village of Glenview in northeast Cook County. The site consists of high quality mesic oak woodlands, mesic upland forest, and floodplain forest along the Chicago River, which divides the preserve in half. Ecological management of the site began in the 1980s by volunteers and Forest Preserves of Cook County staff, and today the site remains under management by a vibrant volunteer community. The site features beautiful woodlands, a diverse set of wildflowers, and a number of rare state-listed species.

The Forest Preserves of Cook County (the “Forest Preserves”) currently has twenty-four (24) dedicated Nature Preserves and four (4) Land and Water Reserves. The addition of Harms Woods would establish the 25th INP and bring the Forest Preserves’ total INP protected lands to approximately 9,860 acres.

It is respectfully requested that authority be granted to the Forest Preserves to submit Harms Woods to the Illinois Nature Preserves Commission for review and formal dedication as an Illinois Nature Preserve.

Report Title: Forest Preserves of Cook County Annual Business Diversity Report FY 2018

Report Period: 1/1/2018 - 12/31/2018

Summary: In July 2012, state legislation authorized the Forest Preserves of Cook County (the “Forest Preserves”) to establish provisions to address the underuse of minority and women-owned businesses with respect to procurement contracts. An ordinance establishing the program’s parameters and guidelines was passed by the Forest Preserves Board of Commissioners in September 2012. This initiative is

significantly benefitting the residents of Cook County by increasing the pool of qualified minority and women-owned businesses that have the opportunity to be selected for contracts awarded by the District each year.

To remedy historic inequity and to facilitate greater inclusion, the Forest Preserves established aspirational contract goals for the participation of minority and women-owned as set forth under the ordinances that comprise the Forest Preserve District of Cook County Municipal Code.

The Minority and Women-Owned Businesses program accomplishments in FY 2018 include; awarded contracts achieved 47% minority and women-owned businesses participation; 55% of contract payments were made to minority and women-owned businesses either as prime contractors or sub-contractors.

The Forest Preserves participated in 16 outreach and workshop conferences, many in collaboration with various government entities. Also, in 2018, the Board approved an amendment to the Minority and Women Business Enterprise Ordinance to create the Established Business Enterprise Program which allows for weighted program participation as Minority and Women-Owned Businesses grow and graduate from the program.
